
Hydrapak®

Easier to Use.
Easier to Clean.
Hydrapak[®]
Drink Systems
Are Better.

Don't get us wrong. We've got tons of respect for inventions. Model-Ts, biplanes, cell phones the size of a suitcase—all great in their day. Hydration packs were like that once. Bag of water, screw top, floppy tube—the first generation was a great idea. But ten years later, we thought it was about time somebody updated things. That's where we come in. Hydrapak's are the next generation. Designed for extreme sports. Better performing. Easier to use and clean. They're a step above the same old hydration packs everybody else makes. And that's good for you. Unless you're still riding one of those old fashioned bicycles with the big giant wheel in the front.

Everything Else Is Just a Bag Full of Water.

Roll and Rock

The roll-top closure is fast, easy and water-tight. Just fill, roll and you're good to go. The hook-and-loop closure locks the roll in place—the seal actually gets stronger under pressure.

Tough Skin

Our reservoirs are made from super-tough, FDA approved thermoplastic polyurethane, the same stuff they use for whitewater rafts and firehose liners. It stays flexible in a wide range of temperatures, is puncture and abrasion resistant and can stretch up to eight times its original length without failing.

Cut the Cord

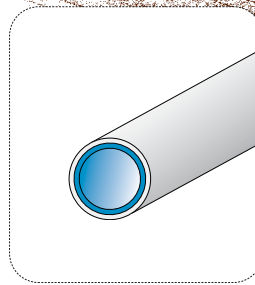

Our Plug-N-Play connector lets you detach the drink tube with the push of a button, even when the reservoir is full.

Hydrapak® drink systems are completely different from ordinary screw-top systems. We designed our roll-top reservoirs to solve all the performance, cleaning and storage problems we found in other company's hydration packs. The Hydrapak system works better and lasts longer so you can drink easier and play harder. It's a good thing we have a patent on this thing.

Can't Taste This

A multi-layer, high-flow drink tube combines a super pure permanent inner lining with a kink-free durable plastic outer layer.

Clean Machine

There's no easier cleaning drink system. Turns inside out in a flash to clean and dry. Fungus, mold and microbes don't stand a chance.

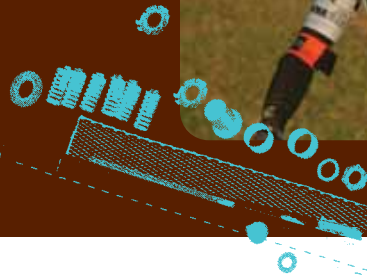

Flow Job

The Easy Flo bite is soft and easy to operate. Bite harder, you get more water. A simple, one-handed shut-off lets you lock it closed for transport.

PERFORMANCE SERIES

Lightweight and low profile for hard rides in hot weather, Performance Series packs are designed to combine load carrying stability with generous reservoirs and wicking fabrics or venting features to keep you cool.

CHUTE

The smallest pack available with our superior reversible reservoir drink system. Zippered gadget pocket, key clip, and hi-visibility reflective light loop.

RESERVOIR
50 OZ / 1.5 L

WEIGHT
8 OZ / 228 G

GEAR STORAGE
30 IN³ / 0.5 L

FLUME

Updated for 2007. Our best-selling performance pack. Comfortable and lightweight with room for essential gear. Top and bottom drink tube exit and options. Sternum strap and external bungee.

RESERVOIR
70 OZ / 2.0 L

WEIGHT
9 OZ / 260 G

GEAR STORAGE
65 IN³ / 1.1 L

STREAMLINE

Updated for 2007. A lightweight, low-profile and high-performance pack with plenty of gear storage. Separate reservoir compartment keeps water from taking up gear storage space. Convenient Plug-N-Play drink tube. External bungee, pockets and a port for earphones or headlamp cords.

RESERVOIR
70 OZ / 2.0 L

WEIGHT
12 OZ / 345 G

GEAR STORAGE
160 IN³ / 2.6 L

BIG SUR

Helmet not included

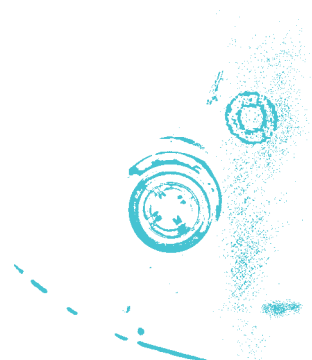

RESERVOIR
100 OZ / 3.0 L

WEIGHT
1 LB 4 OZ / 570 G

GEAR STORAGE
465 IN³ / 7.6 L

+ Air Chairman Ventilation

Updated for 2007. Ventilation, comfort and plenty of cargo space for gear-intensive days on the trail. Ergonomic foam pods on backpanel create ventilation channels to keep you cool. External bungee and expandable backpanel for helmet storage. Convenient Plug-N-Play drink tube. Plenty of pockets and a port for earphones or headlamp cords.

Air Chairman Ventilation

Big packs need big ventilation. We designed the new Air Chairman backpanel system to combine the cushioning and support needed for heavy loads with the air channeling ventilation of our Air Scoop backpanels. The multiple ergonomic pads provide enough surface area for a comfortable fit but also allow air to flow through so your back stays cool.

CHICO

RESERVOIR
68 OZ / 1.5 L

WEIGHT
6.4 OZ / 180 G

GEAR STORAGE
50 IN³ / 0.8 L

A comfortable, easy-to-use, kid-sized Hydrapak with our new FreshFlow drink system. Padded shoulder straps, pocket, and hi-visibility reflective logos.

AS TRAIL

RESERVOIR
70 OZ / 2.0 L

WEIGHT
1 LB 3 OZ / 545 G

GEAR STORAGE
195 IN³ / 3.2 L

Updated for 2007. Just the right amount of water and gear storage for a day on the trail. Air Scoop[®] back with large air-channelling pods to keep you cool. Convenient Plug-N-Play drink tube. External bungee, multiple pockets and compartments, and a port for earphones or headlamp cords.

+ Air Scoop[®] Ventilation

AS CARGO

RESERVOIR
70 OZ / 2.0 L

WEIGHT
1 LB 3 OZ / 545 G

GEAR STORAGE
230-350 IN³ / 3.8-5.8 L

New for 2007. All the performance features of the AS Trail with a capacity-expanding zipper for added gear storage space. Air Scoop[®] back with large air-channelling pods to keep you cool. Internal and external gear pockets, key clip and fleece-lined sunglasses pocket and a port for earphones or headlamp cords.

+ Air Scoop[®] Ventilation

Air Scoop[®] Ventilation

Designed to create a space for airflow between your back and our pack, the Air Scoop helps keep you cool as you ride. The curved backpanel and ergonomically placed foam pods lift the pack off the surface of your back so air can rush through to dissipate body heat and perspiration.

VANGUARD SERIES

Designed for big rides, big air and big gulps, the Vanguard Series packs are multi-sport water and cargo haulers you can customize for your ride. Vanguards incorporate drink tube routing options, straps that work with pads and chest protectors, specialized pockets and ports for MP3 players and other gear, and even options for pad, chest protector and helmet carrying systems.

SCRAMBLE

RESERVOIR
70 OZ / 2.0 L

WEIGHT
13.5 OZ / 385 G

GEAR STORAGE
185 IN³ / 3.0 L

Updated for 2007. Tough enough to perform in any conditions. Small enough to stay out of the way. Wide padded shoulder straps with side-release buckle for easy-on and off over chest protector. Separate reservoir compartment keeps water from taking up gear space. Reflective hits for visibility.

ROOST

RESERVOIR
100 OZ / 3.0 L

WEIGHT
1 LB 8 OZ / 685 G

GEAR STORAGE
260 IN³ / 4.3 L

Updated for 2007. Big enough for an all day ride. Tough enough to perform under any conditions. Wide padded shoulder straps with side-release buckle for easy-on and off over chest protector. Separate reservoir compartment keeps water from taking up gear space. Reflective hits for visibility.

DRANK

RESERVOIR
70 OZ / 2.0 L

WEIGHT
1 LB 3 OZ / 545 G

GEAR STORAGE
290 IN³ / 4.8 L

New for 2007. A multi-sport panel-loader with plenty of space for gear. Tons of pockets including internal organizers, external cell phone pocket, MP3 player and sunglasses pockets and a port for earphones or headlamp cords. Convenient Plug-N-Play drink tube.

GLACIER

Helmet not included

RESERVOIR
100 OZ / 3.0 L

WEIGHT
1 LB 8.5 OZ / 700 G

GEAR STORAGE
450-875 IN³ / 7.4-14.4 L

Updated for 2007. Two packs in one: a fully-loaded hydration pack and a full-sized daypack with plenty of room for gear and straps for holding shin guards and other gear. 360° expansion zipper allows you to double the size of the cargo area. Convenient Plug-N-Play drink tube. Ergonomic foam pods on backpanel create ventilation channels to keep you cool.

+ Air Chairman Ventilation

Air Chairman Ventilation

Big packs need big ventilation. We designed the new Air Chairman backpanel system to combine the cushioning and support needed for heavy loads with the air channeling ventilation of our Air Scoop backpanels. The multiple ergonomic pads provide enough surface area for a comfortable fit but also allow air to flow through so your back stays cool.

TORTUGA

New for 2007. A freeride-inspired multi-sport pack with an EVA foam shell for protection, an insulated reservoir and drink tube for 4-season use. Ergonomic foam pods on backpanel create ventilation channels to keep you cool. Convenient Plug-N-Play drink tube. Plenty of webbing and bungee straps for storing pads and gear.

70 OZ / 2.0 L

WEIGHT
1 LB 13 OZ / 830 G

GEAR STORAGE
430 IN³ / 7.0 L

- + Air Chairman Ventilation
- + Hidden Drink Tube

BORRACHO

Updated for 2007. The pioneering pack that set the standard for full-size freeride and powersports hydration. With an EVA foam shell to protect pack contents and an insulated reservoir and drink tube for 4-season use. Convenient Plug-N-Play drink tube. Plenty of webbing and an extra large spider bungee for storing helmets and other big gear.

RESERVOIR
100 OZ / 3.0 L

WEIGHT
3 LB / 1370 G

GEAR STORAGE
1300 IN³ / 21.3 L

- + Air Chairman Ventilation
- + Hidden Drink Tube

Hidden Drink Tube

Because there are times when it may be awkward to have your drink tube flopping around, we designed a secret compartment in the right shoulder strap to keep it out of sight. It's easy to use and doubles as an insulation solution to keep the tube from freezing in cold weather. Appropriate for opening nights at the symphony and dinners with world leaders.
